

CODINGHOME PUNISHMENT SHEET							Version 2 3/21/2024		The Level System is a system where every user has a level. Every level is a range from 1-6. Every level will expire down a level (example: 3 > 2). Level 0 is the default level. Levels 4-6 is the max, depending on what the user did, may be skipping level 4 or level 5 entirely. For example, if someone was bullying someone, they would get a level 1. If they do something else, level 2, and level 3. If they did something else that isn't considered to be a extreme majority (EMa), and if the next level isn't majority (Ma), level 6. they will get a level 4, and if necessary, they will get banned on level 6. If they were to get level 3and bully someone, they would get banned on level 4 (L4Ma). Check warning logs to ensure their levels are accurate and you can punish the offender correctly.

Rule Broken																	
Bullying & Non-sexual Harassment		L1N		L2Ma		L3Ma		L4EMa						This rule doesn't apply to levels because it's a mess to deal with different kinds of these cases. Instead use the chart provided below.		The following violations are considered to be against Discord ToS/Discord Community Guidelines and will follow the Discord ToS Violation rule protocol. Some of these rules are bold which means to contact Discord Staff. If the rules are bolded, underlined and red, it is simply illegal and may be reported to agencies.
