CODINGHOME PUNISHMENT SHEET

The Level System is a system where every user has a level. Every level is a range from 1-5. Every level will expire down a level (example: 3 > 2). Level 0 is the default level. Level 4-5 is the max, depending on what the user did, may be skipping level 5 entirely. For example, if someone was bullying someone, they would get a level one. If they do something else, level two, and level three. If they did something else that isn't considered to be a majority (Ma), they will get a level four, and if necessary, they will get banned on level five. If they were to get level three and bully someone, they would get banned on level 4 (L4Ma). Check warning logs
